PROFESSIONAL SUMMARY

Delivering Tier 1 and Tier 2 end-user support across 1.5+ years in healthcare IT and high-volume technical support environments — resolving 40+ cases daily across phone, chat, and email while maintaining clean ticket hygiene in Assyst. Skilled in device setup and configuration, guiding non-technical users through everyday use, and documenting fixes so teams resolve repeat issues faster. Quick to learn new device platforms and management tools.

SKILLS

- **End-User Support:** Tier 1/Tier 2 phone, chat, email, and ticket-based support; guiding non-technical users through setup, usage, and best practices
- **Troubleshooting:** hardware, software, connectivity, and user-access issues; structured root-cause diagnostics across Windows, macOS, and mobile devices
- **Ticketing & Documentation:** Assyst; detailed support records, recurring-issue documentation, and knowledge-base style write-ups; privacy and security compliance
- **Systems & Tools:** Windows 10/11, macOS, Linux, Microsoft 365, Active Directory
- **Networking:** TCP/IP, DNS, DHCP, VPN and remote access, Cisco networking (CCNA)

EXPERIENCE

Support Consultant

Nova Scotia Health Authority, Halifax, NS | Feb 2026 – Present

- Supported end users through enterprise Clinical Information System rollouts where new-system issues could block clinical work — diagnosing system access, application, workflow, and connectivity problems and managing each case through Assyst from intake to resolution so clinical teams stayed operational.
- Guided clinicians through system setup, workflows, and best practices during go-live support at 2 emergency departments (Hants and Cobequid) — translating technical steps into clear instructions for non-technical users so new systems were adopted smoothly during live operations.
- Maintained detailed support records for every case and documented recurring issues — escalating complex problems with clear, structured handoffs to Tier 2 and engineering teams, in compliance with privacy and security standards, so the team resolves repeat issues faster.
- Appointed to NSHA's duplicate-MRN (DMRN) team for a 4–6 week assignment after duplicate patient records were flagged for cleanup — analyzing patient charts and historical data to identify and merge duplicate records, improving record accuracy and data integrity.

Technical Support Advisor

Concentrix, Dartmouth, NS | Nov 2025 – Feb 2026

- Resolved 40+ technical cases daily in a high-volume queue across phone, chat, and email — troubleshooting consumer smartphones, tablets, computers, and wearables to deliver working solutions on first contact wherever possible.
- Diagnosed hardware, software, account, login, and connectivity problems for callers stuck mid-task — guiding them through device setup, configuration, and enrollment with clear, patient instructions so they could complete their setup confidently.
- Applied structured diagnostics to isolate root causes on recurring issues — documenting cases accurately and coordinating with internal teams on escalations so complex problems reached resolution instead of stalling.

Student Lab Assistant

Dalhousie University, Halifax, NS | Apr 2024 – Dec 2024

- Maintained accurate electronic and physical documentation for lab operations — identifying discrepancies and following established standards, which kept lab records reliable and audit-ready.
- Triaged technical and administrative requests from students and faculty in a busy academic environment — resolving or routing them promptly so issues reached the right hands without delay.

EDUCATION

- Master of Internetworking — Dalhousie University, Halifax, NS | May 2023 – Dec 2024
- Bachelor of Information Technology — Charusat University, Gujarat, India | Jun 2018 – May 2022
